## **Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis)**

This book presents both theoretical contributions and empirical applications of advanced statistical techniques including geo-additive models that link individual measures with area variables to account for spatial correlation; multilevel models that address the issue of clustering within family and household; multi-process models that account for interdependencies over life-course events and non-random utilization of health services; and flexible parametric alternatives to existing intensity models. These analytical techniques are illustrated mainly through modeling maternal and child health in the African context, using data from demographic and health surveys.

In the past, the estimation of levels, trends and differentials in demographic and health outcomes in developing countries was heavily reliant on indirect methods that were devised to suit limited or deficient data. In recent decades, world-wide surveys like the World Fertility Survey and its successor, the Demographic and Health Survey have played an important role in filling the gap in survey data from developing countries. Such modern demographic and health surveys enable investigators to make in-depth analyses that guide policy intervention strategies, and such analyses require the modern and advanced statistical techniques covered in this book.

The text is ideally suited for academics, professionals, and decision makers in the social and health sciences, as well as others with an interest in statistical modelling, demographic and health surveys. Scientists and students in applied statistics, epidemiology, medicine, social and behavioural sciences will find it of value.

### **From reader reviews:**

#### **Frank Ouellette:**

Why don't make it to be your habit? Right now, try to ready your time to do the important take action, like looking for your favorite e-book and reading a guide. Beside you can solve your problem; you can add your knowledge by the e-book entitled Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis). Try to the actual book Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis) as your pal. It means that it can to get your friend when you truly feel alone and beside that course make you smarter than ever. Yeah, it is very fortuned in your case. The book makes you far more confidence because you can know almost everything by the book. So , let me make new experience as well as knowledge with this book.

#### **Samantha Peay:**

Have you spare time for the day? What do you do when you have more or little spare time? That's why, you can choose the suitable activity for spend your time. Any person spent their very own spare time to take a walk, shopping, or went to the actual Mall. How about open as well as read a book called Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis)? Maybe it is to be best activity for you. You realize beside you can spend your time together with your favorite's book, you can smarter than before. Do you agree with it has the opinion or you have various other opinion?

#### **Maurice Lamothe:**

The particular book Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis) will bring that you the new experience of reading a new book. The author style to elucidate the idea is very unique. When you try to find new book to study, this book very suited to you. The book Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis) is much recommended to you to read. You can also get the e-book from official web site, so you can quicker to read the book.

#### **Elizabeth Easterling:**

Reading a publication tends to be new life style in this era globalization. With looking at you can get a lot of information that can give you benefit in your life. Using book everyone in this world can share their idea. Publications can also inspire a lot of people. Lots of author can inspire their own reader with their story or their experience. Not only the storyplot that share in the publications. But also they write about the ability about something that you need illustration. How to get the good score toefl, or how to teach children, there are many kinds of book that exist now. The authors nowadays always try to improve their ability in writing,

they also doing some investigation before they write to their book. One of them is this Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis).
