Pulmonary Pathology: A Volume in Foundations in Diagnostic Pathology Series (Foundations in Diagnostic Pathology) Dani S. Zander, Carol F. Farver

This volume in the Foundations in Diagnostic Pathology Series packs today's most essential pulmonary pathology into a compact, high-yield format! It covers both common and rare neoplastic and non-neoplastic diseases of the lung and pleura and focuses primarily on diagnosis with correlations to clinical and radiographic characteristics. Its pragmatic, well-organized approach, abundant full-color illustrations, and at-a-glance boxes and tables make the information you need easy to access. Practical and affordable, this resource is ideal for study and review as well as everyday clinical practice!

- Detailed discussions on today's technologies help you select the best test for case evaluation.
- Chapters devoted to the techniques used in the assessment of pulmonary diseases, including immunohistochemistry, immunofluorescence, and certain clinical laboratory tests offer you a better understanding of techniques and their application for the diagnosis of lung disease.
- Internationally recognized pathologists convey the most current information, keeping you on the cusp of your field.
- More than 800 photomicrographs and gross photographs-most in full color-present important pathologic features, enabling you to form a differential diagnosis and compare your findings with actual cases.
- Uses a consistent, user-friendly format, including at-a-glance boxes and tables for easy reference.
