*J. C. Fiaud*

## **Handbook of Palladium-Catalysed Organic Reactions** J. C. Fiaud

This comprehensive handbook will be an indispensable research tool for chemists. **Handbook of Palladium Catalysed Organic Reactions** provides a synoptic description of the main types of reactions which are catalyzed by Palladium and the mechanism which causes these reactions. Each reaction is presented in graphical form and classified according to the type of transformation involved.

Other books covering the use of Palladium complexes as catalysts have been written, but the **Handbook** is the only to offer a synoptic view, showing the catalytic cycle of each reaction. This complete coverage provides the reader with a good understanding of the parameters involved. The tables included can be viewed from the point of view of the reagents, the product of the reaction, or the mechanism involved. The **Handbook** is a companion to the **Database of Palladium Chemistry: Reactions and Catalytic Cycles**, published on CD-ROM.

### Key Features

- \* Begins with explicit instructions from the authors, facilitating use of the Handbook
- \* Details the associated catalytic cycle for each class of reactions
- \* Offers a choice of references, allowing the reader to find the closest example for solving a given problem
- \* 84 types of mechanism covered, plus over 2500 references
- \* Presents graphical abstracts for all reactions described, making it easy to search a type of reaction
- \* Comb-bound for easy reference
- \* Free demo disk included for the Database of Palladium Chemistry
- \* A versatile tool for chemists in the academic community, this handbook will be an invaluable tool in the laboratory
- \* 84 types of mechanism covered, plus over 2500 references
- \* Presents graphical abstracts for all reactions described, making it easy to search a type of reaction
- \* Comb-bound for easy reference
- \* Free demo disk included for the Database of Palladium Chemistry
- \* A versatile tool for chemists in the academic community, this handbook will be an invaluable tool in the laboratory.

**From reader reviews:**

**Steven Maravilla:**

Information is provisions for people to get better life, information these days can get by anyone with everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider when those information which is inside the former life are hard to be find than now's taking seriously which one is suitable to believe or which one typically the resource are convinced. If you have the unstable resource then you have it as your main information you will have huge disadvantage for you. All those possibilities will not happen throughout you if you take Handbook of Palladium-Catalysed Organic Reactions as the daily resource information.

**Sheila Kilburn:**

People live in this new morning of lifestyle always attempt to and must have the spare time or they will get lot of stress from both day to day life and work. So , whenever we ask do people have spare time, we will say absolutely yes. People is human not only a robot. Then we question again, what kind of activity are you experiencing when the spare time coming to anyone of course your answer will certainly unlimited right. Then do you ever try this one, reading books. It can be your alternative inside spending your spare time, the book you have read is Handbook of Palladium-Catalysed Organic Reactions.

**Steve Franklin:**

Don't be worry for anyone who is afraid that this book will probably filled the space in your house, you could have it in e-book method, more simple and reachable. This particular Handbook of Palladium-Catalysed Organic Reactions can give you a lot of good friends because by you looking at this one book you have issue that they don't and make a person more like an interesting person. That book can be one of one step for you to get success. This guide offer you information that perhaps your friend doesn't learn, by knowing more than some other make you to be great men and women. So , why hesitate? We should have Handbook of Palladium-Catalysed Organic Reactions.

**Brandy Godwin:**

What is your hobby? Have you heard which question when you got college students? We believe that that problem was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. So you know that little person like reading or as reading become their hobby. You should know that reading is very important and book as to be the point. Book is important thing to include you knowledge, except your current teacher or lecturer. You will find good news or update concerning something by book. Different categories of books that can you choose to use be your object. One of them is this Handbook of Palladium-Catalysed Organic Reactions.
