**Chemical Signals in Vertebrates 11** Jane Hurst, Robert J. Beynon, S. Craig Roberts, Tristram Wyatt

This volume is comprised of the proceedings of “Chemical Signals in Vertebrates 11”, held July 25th through 28th, 2006 at the University of Chester in the United Kingdom. The volume includes the latest research on chemical communication relevant to vertebrates, particularly focusing on new research since the last meeting in 2003. Topics covered include chemical ecology, biochemistry, behavior, olfactory receptors, and neurobiology of both the main olfactory and vomeronasal systems of vertebrates, from fish to mammals including humans. A broad range of taxonomic groups and topics are discussed, including a special section on human olfaction and response to human scents, interspecific responses (predator/prey and alarm cues), intraspecific responses, and the neural basis of chemical signaling.
