Part of the highly regarded *Diagnostic Pathology* series, this updated volume is a **visually stunning, easy-to-use reference** covering all aspects of head and neck pathology. Outstanding images—including gross and microscopic pathology, a wide range of stains, and detailed medical illustrations—make this **an invaluable diagnostic aid** for every practicing pathologist, resident, or fellow. This second edition incorporates the most recent clinical, pathological, histological, and molecular knowledge in the field to provide a comprehensive overview of all key issues relevant to today's practice.

- **Thoroughly updated content throughout** including new coverage of oropharyngeal carcinoma; HPV-associated, mammary analogue secretory carcinoma; EWSR1 driven tumors; molecular pathways as targets for salivary duct carcinoma; and much more
- **High-quality, carefully annotated color images** (50% new!) provide clinically and diagnostically important information on more than 315 new and evolving entities of the head and neck and endocrine organs
- **State-of-the-art coverage** of tumors, tumor development, and tumor genetics as well as normal histology, genetic testing, and new immunohistochemistry studies
- **Fully integrated, searchable, and linked content** between differential diagnostic categories is perfectly suited for residents, while **updated genetic testing algorithms, new images, and outstanding graphics** make this text ideal for both residents and practitioners
- **Supporting studies are placed into clinical context**, with tables and molecular flow charts that assist with management decisions and prognostic outcome predictions
- **Time-saving reference features** include bulleted text, a variety of test data tables, key facts in each chapter, annotated images, and an extensive index
