Receptors and Ligands in Psychiatry (Intercellular and Intracellular Communication)

Receptors and Ligands in Psychiatry (Intercellular and Intracellular Communication)

This book summarises current studies which involve receptors and ligands in various psychiatric disorders. They emphasise the importance of explaining the mechanisms of action of psychotropic drugs, with the ultimate goal of finding the origins of central nervous system disease and improving therapeutic treatment for such disease. Joint efforts by scientists from different disciplines have been of interest and inform psychiatrists, pharmacologists, neurologists and all neuroscientists.
