On-line LC-NMR and Related Techniques

On-line LC-NMR and Related Techniques

This book gives a comprehensive overview of the basis and the current applications of LC-NMR and related techniques. It deals with the practical aspects of the hardware and software set-up for a successful performance of on-line coupling experiments. It covers the solution of real-world problems from the fields of biomedical, pharmaceutical and environmental studies as well as the analysis of natural products and polymeric compounds. Thus guidelines for an efficient application of the powerful hyphenated technique LC-NMR in combination with LC-MS are presented. Besides LC-NMR, important techniques such as the on-line coupling of gel permeation chromatography and supercritical fluid chromatography, together with ^1H NMR spectroscopy, are described in detail.

Fascinating further aspects, such as the application of capillary separation techniques either in the single or parallel detection mode, together with the possibilities of direct ^{13}C monitoring of chromatographic events, are also discussed.

Key features include:

- * Up-to-date information on the theoretical and experimental methodology
- * Coverage of applications in biomedical, pharmaceutical and natural product analysis, as well as environmental polymer and related hyphenated techniques
- * Information appropriate for researchers in organic, pharmaceutical and medical chemistry

Overall, this book is a requirement for all researchers and staff members dealing with structure elucidation problems in separation science.

From reader reviews:

Stacey Eades:

The e-book with title On-line LC-NMR and Related Techniques includes a lot of information that you can discover it. You can get a lot of benefit after read this book. This kind of book exist new know-how the information that exist in this guide represented the condition of the world now. That is important to yo7u to find out how the improvement of the world. This kind of book will bring you throughout new era of the glowbal growth. You can read the e-book on the smart phone, so you can read this anywhere you want.

Michael Crew:

Do you like reading a guide? Confuse to looking for your preferred book? Or your book was rare? Why so many query for the book? But any kind of people feel that they enjoy for reading. Some people likes reading, not only science book but novel and On-line LC-NMR and Related Techniques or maybe others sources were given know-how for you. After you know how the truly amazing a book, you feel wish to read more and more. Science e-book was created for teacher or perhaps students especially. Those ebooks are helping them to increase their knowledge. In various other case, beside science book, any other book likes On-line LC-NMR and Related Techniques to make your spare time far more colorful. Many types of book like here.

Wayne Queen:

As a university student exactly feel bored to be able to reading. If their teacher questioned them to go to the library or to make summary for some publication, they are complained. Just very little students that has reading's heart or real their passion. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that reading is not important, boring and also can't see colorful photos on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this On-line LC-NMR and Related Techniques can make you experience more interested to read.

Robert Poulin:

Book is one of source of expertise. We can add our understanding from it. Not only for students and also native or citizen have to have book to know the change information of year in order to year. As we know those ebooks have many advantages. Beside many of us add our knowledge, may also bring us to around the world. By book On-line LC-NMR and Related Techniques we can get more advantage. Don't you to be creative people? To be creative person must want to read a book. Merely choose the best book that suitable with your aim. Don't always be doubt to change your life by this book On-line LC-NMR and Related Techniques. You can more attractive than now.
