Membrane Permeability: 100 Years Since Ernest Overton: 48 (Current Topics in Membranes)

Membrane Permeability: 100 Years Since Ernest Overton: 48 (Current Topics in Membranes)

Membrane permeability is fundamental to all cell biology and subcellular biology. The cell exists as a closed unit. Import and export depend upon a number of sophisticated mechanisms, such as active transport, endocytosis, exocytosis, and passive diffusion. These systems are critical for the normal housekeeping physiological functions. However, access to the cell is also taken advantage of by toxic microbes (such as cholera or ptomaine) and when designing drugs.

Ernest Overton, one of the pioneers in lipid membrane research, put forward the first comprehensive theory of lipid membrane structure. His most quoted paper on the osmotic properties of cells laid the foundation for the modern concepts of membrane function, most notably important in anesthesia.

This book is designed to celebrate the centennial anniversary (in the first chapter) of Overton's work.

Subsequent chapters present readers with up-to-date concepts of membrane structure and function and the challenge they pose for new explorations.

Key Features

- * Provides an historical perspective of Overton's contributions to the theory of narcosis
- * Presents an overview of each permeability mechanism, including active transport, endocytosis, exocytosis, and passive diffusion

From reader reviews:

Bob Pratt:

Have you spare time for any day? What do you do when you have considerably more or little spare time? That's why, you can choose the suitable activity for spend your time. Any person spent all their spare time to take a walk, shopping, or went to the actual Mall. How about open or perhaps read a book entitled Membrane Permeability: 100 Years Since Ernest Overton: 48 (Current Topics in Membranes)? Maybe it is to get best activity for you. You realize beside you can spend your time using your favorite's book, you can cleverer than before. Do you agree with it is opinion or you have various other opinion?

Chester Hassel:

Book will be written, printed, or descriptive for everything. You can recognize everything you want by a publication. Book has a different type. As we know that book is important thing to bring us around the world. Close to that you can your reading skill was fluently. A guide Membrane Permeability: 100 Years Since Ernest Overton: 48 (Current Topics in Membranes) will make you to possibly be smarter. You can feel far more confidence if you can know about anything. But some of you think in which open or reading some sort of book make you bored. It is far from make you fun. Why they may be thought like that? Have you searching for best book or ideal book with you?

Robert Alston:

Are you kind of active person, only have 10 or maybe 15 minute in your time to upgrading your mind talent or thinking skill possibly analytical thinking? Then you are receiving problem with the book compared to can satisfy your short period of time to read it because pretty much everything time you only find book that need more time to be learn. Membrane Permeability: 100 Years Since Ernest Overton: 48 (Current Topics in Membranes) can be your answer as it can be read by a person who have those short time problems.

Tommy Worm:

Don't be worry for anyone who is afraid that this book will certainly filled the space in your house, you will get it in e-book method, more simple and reachable. This specific Membrane Permeability: 100 Years Since Ernest Overton: 48 (Current Topics in Membranes) can give you a lot of pals because by you taking a look at this one book you have thing that they don't and make anyone more like an interesting person. This kind of book can be one of a step for you to get success. This guide offer you information that perhaps your friend doesn't know, by knowing more than additional make you to be great people. So , why hesitate? Let's have Membrane Permeability: 100 Years Since Ernest Overton: 48 (Current Topics in Membranes).
