## **Mission to Pluto: The First Visit to an Ice Dwarf and the Kuiper Belt (Scientists in the Field Series)**

Mary Kay Carson

In July of 2015 a robotic spacecraft reached Pluto after a nine-and-half-year journey. *New Horizons* is the first spacecraft mission to Pluto and revealed its five moons as never before seen. Images from the mission show a reddish surface covered in ice-water mountains, moving glaciers, and hints of possible ice volcanoes and an underground ocean. Pluto is geologically alive and changing!

This addition to the Scientists in the Field series goes where no person or spacecraft has ever gone before. Follow along with the team of scientists as they build *New Horizons*, fly it across the solar system, and make new discoveries about a world three billion miles away.
