Nonhuman DNA Typing: Theory and Casework Applications (International Forensic Science and Investigation)

The association of a suspect with the victim or crime scene through DNA evidence is one of the most powerful statements of complicity in a crime imaginable. No category of evidence has ever had the complete capacity to convict or exonerate an accused so absolutely in the eyes of the public. With the discriminatory powers of DNA and the variety of DNA markers now in regular use, the one thing keeping a third of all cases unsolved is the lack of human DNA evidence. However, the identification of polymorphic genetic loci in cats, dogs, plants, insects, bacteria, and viruses can provide the critical link between suspect and scene in the absence of human DNA.

Non-Human DNA Typing: Theory and Casework Applications provides an introduction to the basic science underlying the emerging field of non-human DNA typing. It examines the use of non-human DNA evidence not just in homicide cases, but also in drug trafficking, poaching of endangered species, livestock fraud, and missing persons, as well as the identification of primary and secondary crime scenes. The book demonstrates the recognition, collection, and preservation of biological evidence at a crime scene, techniques of DNA fingerprinting, and DNA profiling. Using a wide variety of examples, applications, and case studies, the author describes the STR analysis of canine and feline samples, insects, and fungi, and their role as evidence in forensic science. Chapters consider the development of testing methods for animal evidence, soil DNA typing, and the use of DNA typing in wildlife investigations. A useful appendix includes an overview of the history of forensic serology and DNA.

Combining science, case examples, legal decisions, and references, Non-Human DNA Typing: Theory and Casework Applications presents the forensic and legal applications of non-human DNA evidence for scientists, law enforcement, and attorneys.

From reader reviews:

Belia Gillespie:

The particular book Nonhuman DNA Typing: Theory and Casework Applications (International Forensic Science and Investigation) will bring you to the new experience of reading a new book. The author style to describe the idea is very unique. Should you try to find new book to see, this book very acceptable to you. The book Nonhuman DNA Typing: Theory and Casework Applications (International Forensic Science and Investigation) is much recommended to you to see. You can also get the e-book from the official web site, so you can more easily to read the book.

Irma Huges:

Playing with family in the park, coming to see the ocean world or hanging out with friends is thing that usually you may have done when you have spare time, and then why you don't try issue that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Nonhuman DNA Typing: Theory and Casework Applications (International Forensic Science and Investigation), it is possible to enjoy both. It is fine combination right, you still wish to miss it? What kind of hang type is it? Oh come on its mind hangout folks. What? Still don't have it, oh come on its called reading friends.

Eleanor Sotomayor:

Your reading 6th sense will not betray you, why because this Nonhuman DNA Typing: Theory and Casework Applications (International Forensic Science and Investigation) guide written by well-known writer whose to say well how to make book which can be understand by anyone who have read the book. Written inside good manner for you, leaking every ideas and publishing skill only for eliminate your personal hunger then you still hesitation Nonhuman DNA Typing: Theory and Casework Applications (International Forensic Science and Investigation) as good book not merely by the cover but also with the content. This is one book that can break don't evaluate book by its cover, so do you still needing one more sixth sense to pick this specific!? Oh come on your examining sixth sense already said so why you have to listening to an additional sixth sense.

Dennis Gaines:

This Nonhuman DNA Typing: Theory and Casework Applications (International Forensic Science and Investigation) is great guide for you because the content which can be full of information for you who all always deal with world and get to make decision every minute. This book reveal it details accurately using great manage word or we can point out no rambling sentences inside. So if you are read this hurriedly you can have whole data in it. Doesn't mean it only provides you with straight forward sentences but challenging core information with splendid delivering sentences. Having Nonhuman DNA Typing: Theory and Casework Applications (International Forensic Science and Investigation) in your hand like getting the world in your

arm, information in it is not ridiculous a single. We can say that no reserve that offer you world within ten or fifteen second right but this publication already do that. So , this really is good reading book. Hey there Mr. and Mrs. occupied do you still doubt this?
