A First Course in Structural Equation Modeling

Tenko Raykov, George A. Marcoulides

A First Course in Structural Equation Modeling Tenko Raykov, George A. Marcoulides

In this book, authors Tenko Raykov and George A. Marcoulides introduce students to the basics of structural equation modeling (SEM) through a conceptual, nonmathematical approach. For ease of understanding, the few mathematical formulas presented are used in a conceptual or illustrative nature, rather than a computational one.

Featuring examples from EQS, LISREL, and Mplus, A First Course in Structural Equation Modeling is an excellent beginner's guide to learning how to set up input files to fit the most commonly used types of structural equation models with these programs. The basic ideas and methods for conducting SEM are independent of any particular software.

Highlights of the Second Edition include:

- Review of latent change (growth) analysis models at an introductory level
- Coverage of the popular Mplus program
- Updated examples of LISREL and EQS
- A CD that contains all of the text's LISREL, EQS, and Mplus examples.

A First Course in Structural Equation Modeling is intended as an introductory book for students and researchers in psychology, education, business, medicine, and other applied social, behavioral, and health sciences with limited or no previous exposure to SEM. A prerequisite of basic statistics through regression analysis is recommended. The book frequently draws parallels between SEM and regression, making this prior knowledge helpful.

From reader reviews:

Evelyn Spencer:

Have you spare time for the day? What do you do when you have much more or little spare time? Sure, you can choose the suitable activity for spend your time. Any person spent all their spare time to take a walk, shopping, or went to the Mall. How about open or perhaps read a book titled A First Course in Structural Equation Modeling? Maybe it is for being best activity for you. You realize beside you can spend your time with your favorite's book, you can wiser than before. Do you agree with their opinion or you have some other opinion?

Lauren Allison:

This A First Course in Structural Equation Modeling book is simply not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is actually information inside this publication incredible fresh, you will get facts which is getting deeper a person read a lot of information you will get. This specific A First Course in Structural Equation Modeling without we know teach the one who reading it become critical in pondering and analyzing. Don't possibly be worry A First Course in Structural Equation Modeling can bring whenever you are and not make your case space or bookshelves' turn into full because you can have it within your lovely laptop even mobile phone. This A First Course in Structural Equation Modeling having fine arrangement in word and also layout, so you will not sense uninterested in reading.

Justin Davis:

Information is provisions for anyone to get better life, information today can get by anyone in everywhere. The information can be a information or any news even a huge concern. What people must be consider when those information which is from the former life are hard to be find than now's taking seriously which one would work to believe or which one often the resource are convinced. If you get the unstable resource then you have it as your main information you will see huge disadvantage for you. All of those possibilities will not happen inside you if you take A First Course in Structural Equation Modeling as your daily resource information.

Richard Lawrence:

Hey guys, do you would like to finds a new book you just read? May be the book with the title A First Course in Structural Equation Modeling suitable to you? The particular book was written by popular writer in this era. Typically the book untitled A First Course in Structural Equation Modelingis the main of several books that will everyone read now. This book was inspired many people in the world. When you read this book you will enter the new way of measuring that you ever know prior to. The author explained their strategy in the simple way, therefore all of people can easily to know the core of this e-book. This book will give you a large amount of information about this world now. So that you can see the represented of the

world in this particular book.
