Learning OpenCV: Computer Vision with the OpenCV Library Gary Bradski, Adrian Kaehler

"This library is useful for practitioners, and is an excellent tool for those entering the field: it is a set of computer vision algorithms that work as advertised."-William T. Freeman, Computer Science and Artificial Intelligence Laboratory, Massachusetts Institute of Technology

Learning OpenCV puts you in the middle of the rapidly expanding field of computer vision. Written by the creators of the free open source OpenCV library, this book introduces you to computer vision and demonstrates how you can quickly build applications that enable computers to "see" and make decisions based on that data.

Computer vision is everywhere-in security systems, manufacturing inspection systems, medical image analysis, Unmanned Aerial Vehicles, and more. It stitches Google maps and Google Earth together, checks the pixels on LCD screens, and makes sure the stitches in your shirt are sewn properly. OpenCV provides an easy-to-use computer vision framework and a comprehensive library with more than 500 functions that can run vision code in real time.

Learning OpenCV will teach any developer or hobbyist to use the framework quickly with the help of hands-on exercises in each chapter. This book includes:

- A thorough introduction to OpenCV
- Getting input from cameras
- Transforming images
- Segmenting images and shape matching
- Pattern recognition, including face detection
- Tracking and motion in 2 and 3 dimensions
- 3D reconstruction from stereo vision
- Machine learning algorithms

Getting machines to see is a challenging but entertaining goal. Whether you want to build simple or sophisticated vision applications, *Learning OpenCV* is the book you need to get started.

From reader reviews:

Vincent Baker:

Nowadays reading books become more than want or need but also get a life style. This reading addiction give you lot of advantages. The advantages you got of course the knowledge your information inside the book in which improve your knowledge and information. The details you get based on what kind of e-book you read, if you want drive more knowledge just go with schooling books but if you want feel happy read one with theme for entertaining for instance comic or novel. The Learning OpenCV: Computer Vision with the OpenCV Library is kind of e-book which is giving the reader capricious experience.

Evelyn Montgomery:

This book untitled Learning OpenCV: Computer Vision with the OpenCV Library to be one of several books which best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit on it. You will easily to buy this particular book in the book retail store or you can order it by way of online. The publisher with this book sells the e-book too. It makes you more readily to read this book, as you can read this book in your Smart phone. So there is no reason to you to past this publication from your list.

Dolores Mann:

The reserve with title Learning OpenCV: Computer Vision with the OpenCV Library has lot of information that you can study it. You can get a lot of profit after read this book. This particular book exist new expertise the information that exist in this publication represented the condition of the world at this point. That is important to yo7u to understand how the improvement of the world. This particular book will bring you with new era of the globalization. You can read the e-book on your own smart phone, so you can read it anywhere you want.

Rudy Hendren:

Are you kind of occupied person, only have 10 or maybe 15 minute in your time to upgrading your mind ability or thinking skill even analytical thinking? Then you are receiving problem with the book than can satisfy your short period of time to read it because all this time you only find guide that need more time to be go through. Learning OpenCV: Computer Vision with the OpenCV Library can be your answer as it can be read by you who have those short free time problems.
